

BUILDTOG[®]: *Building Together*

Constructing a common building
in the Passiv Haus standard
in 6 different countries

Call for partnership

Eurhonet is a European Network linking 27 housing companies.

In the frame of our works on Energy Savings, we are looking for Housing Companies interested in the construction of a Buildtog[®].

What is a Buildtog[®]?

Buildtog[®] is a common architectural design drawn by ANMA, a French architectural firm, and by Luwoge Consult, a German Thermal Institute.

Buildtog[®] is the result of the works of Eurhonet Energy Savings group, involving 10 housing companies.

Buildtog[®] is an efficient design that has to be adapted in several countries, respecting the local building traditions and legislations.

The first Buildtogs[®] should be completed by the end of 2013, up to 2015.

The aim of this project is to compare the different approaches, step by step, in order to construct one of the first transnational buildings respecting the Passiv Haus standard.

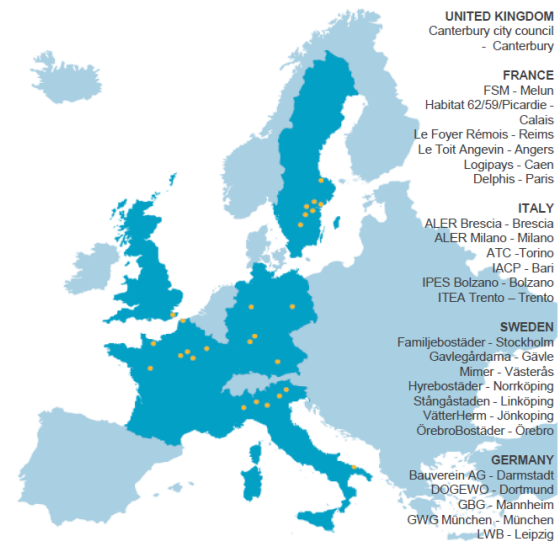

This complete transfer of experiences and knowledge will lead to produce guidelines for architectural, comfortable and efficient construction.

Each participating company agrees to participate to Eurhonet's costs (7 000€). It also agrees to hire the energy consulting services of Luwoge Consult (about 12 000€) and the architecture consulting services of ANMA (12 000€), in order to ensure that the basic concept of Buildtog[®] is respected when implemented in the country.

If your company is eager to join us for this project, you can send an e-mail or a letter of interest to Marielle FRECHARD, Foyer Rémois (France)

+333 26 84 35 93 // m.frechard@foyer-remois.fr

You will receive a more detailed description of the project and a meeting will then be proposed to you.
